

CHANG JUNG SENIOR HIGH SCHOOL E-NEWS

✧ Introduction

Chang Jung Senior High School is the first middle school in Taiwan. With a long history of 129 years, we have educated many distinguished alumni in all walks of life at home and abroad. Since our school was founded in 1885, we have been

trying to globalize and internationalize the teaching methods and activities. In addition to creating an excellent learning environment, our principal, Mr. Wang, always encourages students to cultivate a positive thinking ability and inspire creativity through aggressive learning

process. With Christian spirits, both teachers and students in Chang Jung Senior High School work hard to make commitment to great causes and do their best to contribute as much as they can to the country.

✧ School activities highlights

Both the students and teachers in Chang Jung Senior High School show great enthusiasm in participating in international culture- exchanging programs. In the past few months, we have sister schools from Japan, Germany, American and Korea to visit our school.

Not only the students but also the teachers benefit a lot from the homestay program. They experienced different cultures and customs through the pleasant interaction. Most important of all, the students have broadened their horizon and developed a long-lasting friendship with our foreign friends.

✧ Christmas celebration and activities

An array of Christmas celebrations kicked off with our

principal Wang and the directors dressing up as Santa Claus, giving away candies on the morning of December

24th. To experience the true meaning of Christmas and

honor the great day, we had a host of activities and performances, featuring tree lighting, Christmas carols

competitions and dramas. It is a time of joy, spirit, love and

happiness, so we want our students to enliven and nurture sweet and harmonious relationship with friends,

families and teachers on this cherished occasion.

To commemorate the 128th anniversary of Chang Jung Senior High School, a two-day athletic meeting was held on

February 26th and 27th. We combined the health-improving program with the sports meeting to convey the message

that our students should develop strong well-beings through different kinds of sports competitions while stressfully

focusing on their schoolwork. Not only do the sports games help students stay well-built, but also help them gain a

sense of responsibility and a sense of honor through teamwork. We expect our students to strike a balance between studying hard and staying healthy.

The health-improving program involves crime-fighting campaign and anti-drug propaganda. To enliven the opening

ceremony, we also invited the primary school students in our neighborhood to participate in the sports games,

carnivals, performances and gymnastics. We hope that through various kinds of sports competitions, our students can cultivate perseverance, resilience and sportsmanship.

✧ **Astonishing achievements in different fields**

The teachers in Chang Jung Senior High School have been doing their best to instruct and enlighten the students

with a view to making them well-rounded and talented. The students from our secondary school who have made great

achievements in General Scholastic Ability Test obtained scholarship provided by Chang Jung Senior High School.

Moreover, the students from our vocational school also displayed their shining talents in a variety of international competitions such as 2014 International Youth Invention Exhibition, Seoul International Invention Fair 2013, 2013 Asian robot athletic contest, and 2013 Financial Terminology Olympiad.
